

## 24-HOUR DISPATCH: 1-888-894-4411

|  |   |
|--|---|
| <p><b>VACUUM TRUCK (1)</b></p>  <p>These liquid hauling units are specialized vehicles designed to suction, transport, and dispose of all wet materials such as liquids, sludge, and slurries.</p>   | <p><b>CONFINED SPACE/SAFETY VAN (6)</b></p>  <p>Space Entry and rescue services including hazard assessments, gas detectors, tripods, harnesses and ventilation equipment.</p>  |
| <p><b>COMBO FLUSH/VACUUM (8)</b></p>  <p>This combination flush and vacuum unit combines the dual functionality of high-pressure water flushing (jetting) and powerful vacuum suction in one vehicle. This makes it a versatile and efficient tool for cleaning and maintaining sewer systems, industrial sites, sewer and storm drains.</p>                     | <p><b>VACUUM TRUCK (9)</b></p>  <p>These liquid hauling units are specialized vehicles designed to suction, transport, and dispose of all wet materials such as liquids, sludge, slurries, or solids. Tandem axle configuration for hard-to-reach areas. This truck also features a hook which can support a faster turnaround for larger projects.</p>   |
| <p><b>VACUUM TRUCK (15)</b></p>  <p>These liquid hauling units are specialized vehicles designed to suction, transport, and dispose of all wet materials such as liquids, sludge, slurries, or solids. Tandem axle configuration for hard to reach areas.</p>  | <p><b>DOT CODE/TDG CERTIFIED VACUUM TRUCK (27)</b></p>  <p>These liquid hauling units are specialized vehicles designed to suction, transport, and dispose of all wet materials such as liquids, sludge, slurries, or solids. This truck is TDG Certified and perfect for gas, oil and chemical spills. Tandem axle configuration for hard to reach areas.</p>  |
| <p><b>DOT CODE/TDG CERTIFIED VACUUM TRUCK (28)</b></p>  <p>These liquid hauling units are specialized vehicles designed to suction, transport, and dispose of all wet materials such as liquids, sludge, slurries, or solids. This truck is TDG Certified and perfect for gas, oil and chemical spills. Tandem axle configuration for hard-to-reach areas.</p> | <p><b>TRI-AXLE COMBO FLUSH/VACUUM TRUCK (29)</b></p>  <p>This tri-axle configuration is a combination flush and vacuum unit combines the dual functionality of high-pressure water flushing (jetting) and powerful vacuum suction in one vehicle. This makes it a versatile and efficient tool for cleaning and maintaining sewer systems, industrial sites, sewer and storm drains. The "tri-axle" configuration makes it perfect for those "heavy" loads.</p> |
